

(The track looks disjointed, but this is just a cropping error)

Features:

- 840x620 screen dimensions
- 25+ fps
- Realistic movement/velocity
- Hard-coded control points
- Doesn't crash and/or burn upon completing a lap (thanks, gdb)

Special Feature

- Loop-de-loop!
- Camera/track tilt on corners
- B-Spline curve coords converted to Bezier, then subdivided for smoothness

Keybinds:

- | | |
|--------|--|
| T t | Toggles between riding on the track and orbiting |
| S s | Toggles the sun (changes size of the sky; purely for aesthetics) |
